Buffalo District CELRB-CO-R RE: 1999-02752(0) Section: OH 404

**Application for Permit under Authority of
Section 404 of the Clean Water Act (33 U.S.C. 1344).**

The Summit County Engineer's Office, 538 E. South Street, Akron, Ohio 44311 has requested a Department of the Army permit to relocate a portion of Brandywine Creek during the replacement of the Olde Eight Road bridge. The project is located near 8500 Olde Eight Road and just west of Interstate 271, Northfield Center, Summit County, Ohio.

The project consists of the following:

- a. A new and widened (trapezoidal) channel approximately 250 feet long for Brandywine Creek will be excavated 70 feet southeast of the current channel. The excavated material will be stockpiled in an upland area.
- b. The proposed new bridge will be 88.5 feet long and 37.4 feet wide and will be built over the newly excavated channel with the south abutment founded on bedrock and the north abutment founded on shafts drilled into bedrock. A total of approximately 216 cubic yards of rock channel protection will be installed on the north and south banks of the new channel at a 2H:1V slope.
- c. An additional 300 linear feet of the downstream north bank will be excavated to eliminate a flow restriction. This excavated material will be used in the filling of the old channel.
- d. Water will be rerouted through the new channel; the old bridge will be removed and approximately 350 feet of the old channel will be filled with the excavated material. Approximately 2844 cubic yards of fill will be placed in the old channel, of which 1576 cubic yards of material will be placed below ordinary high water (O.H.W.), 290.9 feet at station 2+00.
- e. Approximately 0.041 acre of disturbed wetland located south of Brandywine Creek and east of Olde Eight Road will be altered and/or filled during the channel relocation.

The applicant's stated purpose is to replace a functionally obsolete bridge and solve the erosion problem on the north bank of Brandywine Creek in the vicinity of the Olde Eight Road crossing.

Location and details of the above described work are shown on the attached maps and drawings.

Questions pertaining to the work described in this notice should be directed to Elizabeth W. Stone, who can be contacted by calling (716) 879-4363, or by e-mail at: Elizabeth.W.Stone@usace.army.mil

The following authorization(s) may be required for this project:

Water Quality Certification (or waiver thereof) from the Ohio Environmental Protection Agency.

There are no registered historic properties or properties listed as being eligible for inclusion in the National Register of Historic Places that will be affected by this project.

In addition, available evidence indicates that the proposed work will not affect a species proposed or designated by the U.S. Department of the Interior as threatened or endangered, nor will it affect the critical habitat of any such species.

This notice is promulgated in accordance with Title 33, Code of Federal Regulations, parts 320-330. Any interested party desiring to comment on the work described herein may do so by submitting their comments, in writing, so that they are received no later than 4:30 pm on the expiration date of this notice.

Comments should be sent to the U. S. Army Corps of Engineers, 1776 Niagara Street, Buffalo, New York 14207-3199, and should be marked to the attention of Elizabeth W. Stone, or by e-mail at: Elizabeth.W.Stone@usace.army.mil. A lack of response will be interpreted as meaning that there is no objection to the work as proposed.

Comments submitted in response to this notice will be fully considered during the public interest review for this permit application. All written comments will be made a part of the administrative record. Due to resource limitations, this office will normally not acknowledge the receipt of comments or respond to individual letters of comment.

Any individual may request a public hearing by submitting their written request, stating the specific reasons for holding a hearing, in the same manner and time period as other comments.

Public hearings for the purposes of the Corps permit program will be held when the District Commander determines he can obtain additional information, not available in written comments, that will aid him in the decision making process for this application. A Corps hearing is not a source of information for the general public, nor a forum for the resolution of issues or conflicting points of view (witnesses are not sworn and cross examination is prohibited). Hearings will not be held to obtain information on issues unrelated to the work requiring a permit, such as property ownership, neighbor disputes, or the behavior or actions of the public or applicant on upland property not regulated by the Department of the Army. Information obtained from a public hearing is given no greater weight than that obtained from written comments. Therefore, you should not fail to make timely written comments because a hearing might be held.

The decision to approve or deny this permit request will be based on an evaluation of the probable impact, including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among these are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Paul G. Leuchner
Chief, Regulatory Branch

NOTICE TO POSTMASTER: It is requested that this notice be posted continuously and conspicuously for 30 days from the date of issuance.
